

CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-10. (Canceled)

11. (Currently amended) ~~The~~ An interior lamp device ~~according to Claim 10, for a transport device, comprising:~~

laminated glass with a transparent glass surface, and
at least one interior lamp integrated in the laminated glass with the glass surface for illuminating an interior of the transport device,

wherein the interior lamp has a printed-circuit board with light-emitting diodes and an associated electronic system,

wherein the light of the light-emitting diode, for a lighting function, is coupled into a light output panel of the laminated glass, and

wherein the light output element panel is a glass pane with an edge area into which the light of the light-emitting diode is coupled.

12-16. (Canceled)

17. (Currently amended) The interior lamp device according to Claim 11, wherein the interior lamp has a housing into which the printed-circuit board and the light output element panel are inserted.

18. (Currently amended) The interior lamp device according to Claim 17, wherein the housing has a groove for the printed-circuit board and a groove for the light output ~~element~~ panel, and wherein openings are provided in the housing such that light of the light-emitting diodes can be coupled into the light output ~~element~~ panel.

19. (Currently amended) The interior lamp according to Claim 17, wherein the housing is a flat housing that, with the light output ~~element~~ panel, is adapted to a contour of the roof.

20. (Previously presented) The interior lamp according to Claim 17, further comprising supply and control lines that extend from an edge of the laminated glass to the housing.

21. (Currently amended) The interior lamp according to Claim 17, wherein the housing and the light output ~~element~~ panel have square, rectangular, round, or oval geometrical shapes.

22. (Canceled)

23. (Currently amended) The interior lamp according to Claim 18, wherein the housing is a flat housing that, with the light output ~~element~~ panel, is adapted to a contour of the roof.

24. (Canceled)

25. (Previously presented) The interior lamp according to Claim 18, further comprising supply and control lines that extend from an edge of the laminated glass to the housing.

26. (Canceled)

27. (Previously presented) The interior lamp according to Claim 19, further comprising supply and control lines that extend from an edge of the laminated glass to the housing.

28. (Currently amended) The interior lamp according to Claim 13, wherein the housing and the light output ~~element~~ panel have square, rectangular, round, or oval geometrical shapes.
